CBS NEWS/NEW YORK TIMES POLL
For release: Thursday, February 11th, 2010
6:30 PM (EST)

THE PRESIDENT, CONGRESS AND DISSATISFACTION WITH GOVERNMENT
February 5-10th, 2010

The latest CBS News/New York Times Poll finds most Americans are now dissatisfied or even angry with government - and much of that frustration is directed at Congress, which now receives just a 15% approval rating. Levels of distrust and cynicism about government are at or near 15-year highs.

Dissatisfaction extends to both political parties as well - the Democratic and Republican parties are near record high unfavorable ratings in CBS News/New York Times Polls.

As Americans continue to worry about the economy, President Barack Obama's job approval rating is 46%, matching his previous low from early January. But he, not Congress or the Republicans, is more often viewed as representing and understanding Americans' interests and

The Secret to Programs that Work, by

CAP STUDY

- Millennials, ages 18 to 32, have more confidence in government and rate its performance higher than do older adults.
- Young adults are also strongly receptive to a reform agenda that would strip away wasteful spending and focus on improvements in the delivery of government services.

The Federal Government Should Track Killings by Local Police Officers

"Many Oakland community leaders cited the fatal shooting as proof that racial tension remains between law enforcement and black residents." Remember Oscar Grant

Feds probe of police is sought - [ContraCostaTimes.com](http://www.contracostatimes.com)

SHOOTING: Long Beach family, joined by Oakland supporters, says the Justice Department will be asked to investigate.

January 5 at 5:02pm · Share

2 people like this.

Newton He The Long Beach is so dumb that how could u should a citizen who is not crook , gang member, or a rapist! These POLICE officers are just drug addicts who just want flesh. SO Face it Whats the point of killing. Maybe Long Beach and Oakland should stand together.

Carl Malamud

From Wikipedia, the free encyclopedia

Carl Malamud (born 1959) is a technologist, author, and [public domain](#) advocate, currently known for his foundation [public.resource.org](#). He was the founder of the [Internet Multicasting Service](#). During his time with this group, he was responsible for creating the first [Internet radio](#) station,^[1] for putting the [U.S. Securities and Exchange Commission's EDGAR](#) database on-line,^[2] and for creating the Internet 1996 World Exposition.^[3]

Malamud is the author of eight books, including *Exploring the Internet* and *A World's Fair*.^{[4][5]} He was a visiting professor at the [MIT Media Laboratory](#) and was the former chairman of the [Internet Software Consortium](#). He also was the co-founder of [Invisible Worlds](#), was a fellow at the [Center for American Progress](#), and was a board member of the non-profit [Mozilla Foundation](#).^{[6][7]}

Protecting the public domain

[edit]

Most recently, Malamud has set up the nonprofit [public.resource.org](#), headquartered in [Sebastopol, California](#), to work for the publication of public domain information from local, state, and federal government agencies.^[8] Among his achievements have been digitizing 588 government films for the Internet Archive and YouTube,^[9] publishing a 5 million page crawl of the [Government Printing Office](#),^[10] and persuading the state of Oregon to not assert copyright over its legislative statutes.^[11] He has also been active in challenging the state of [California's](#) copyright claims on state laws by publishing copies of the criminal, building, and plumbing codes online.^[12]

Carl Malamud speaking at the UC Berkeley iSchool about ["\(Re-\)defining the public domain"](#), October 17, 2007.

Data Catalog

For years the District of Columbia has provided public access to city operational data through the Internet. Now the District provides citizens with the access to 474 datasets from multiple agencies, a catalyst ensuring agencies operate as more responsive, better performing organizations. Use the data catalog below to subscribe to a live data feed in Atom format and access data in XML, Text/CSV, KML or ESRI Shapefile formats. Please note that by accessing the data catalog and feeds, you agree to our [Terms of Use](#). Please read before accessing the data. All data visualizations on maps should be considered approximate. The visualizations provided by this application

include only records that can be mapped. If you have any questions or comments about the DC Data Catalog, please contact us at citydw@dc.gov. Visit [DC FOIA page](#) for information on FOIA requests.

Create Your Own Visualizations using DC datasets

Free websites such as [Many Eyes](#) allow users to create and share a variety of data visualizations. Below are the links to some interactive graphs and charts created based on DC datasets. You can create your own visualization using already uploaded datasets or slice and dice data the way no one did before. Please email us at citydw@dc.gov if you want your visualization to be featured on this page.

New design & features coming soon!

[Subscribe to Data Catalog News](#) feed to get updates. For Developers, we provide the [Data Catalog Description](#) and [Data Catalog Updates](#).

For more information on government operations and performance monitoring visit the [CapStat](#) website or view [Summary Reports](#).

Text / CSV: Use this format for easy access to the data. Text/CSV files could be opened by most desktop spreadsheet applications (e.g. MS Excel).

Atom feed: Better suited for consumption by automated programs capable of handling Atom files. Allows subscription to data feed for continuous updates. [Learn more about Atom](#). We support GeoRSS extension which includes location as part of a feed.

XML: Better suited for consumption by automated programs capable of handling raw XML files.

ESRI: Used for consumption by ESRI-compatible mapping applications. Most datasets in ESRI format are updated on a monthly or quarterly basis as they are not "operational" in nature.

KML: Used to display geospatial data in Google Earth, Google Maps, and similar applications.

What is DataSF?

DataSF is a clearinghouse of datasets available from the City & County of San Francisco. Our goal in releasing this site is:

- (1) improve access to data
- (2) help our community create innovative apps
- (3) understand what datasets you'd like to see
- (4) get feedback on the quality of our datasets.

THE CHALLENGES OF DO-IT-OURSELVES (DIO) GOVERNMENT

SHARE THIS

Posted on October 29, 2010 by Jennifer Pahlka in Commentary

Lauren Collins's *New Yorker* article on British Prime Minister David Cameron's agenda of civic engagement contains a number of real gems, most of them as sobering as they are entertaining. I had to laugh out loud at some of the tweets she reports from an event billed as a „listening tour,“ in the format of unconference organized by the Big Society Network. „This is like speed-dating crossed with a slave auction in hell,“ said one. Ouch.

The **Big Society** is Cameron's notion that citizens can do a better job of solving social and civic problems than government, and in fact will likely be the only force that *can* do it as the budget deficit in Britain cripples the state. Collins describes Cameron's vision as „a garden-fence government, in which little platoons of concerned citizens, unhindered by senseless regulations and sclerotic bureaucracies, band together to

conceive and execute the governance of their own communities.„ That I find a lot to like in that idea is probably unsurprising, given how much these ideas have in common with Tim O'Reilly's belief in „government as a platform,“ and the ways that platform can transfer some of its power to act to citizens. But Collins spots within the movement a troubling sense of withdrawal and unfounded optimism. She suggests that Big Society leaders appear to be trying to relieve themselves of almost all responsibility to actually govern, while hoping citizens will pick up the

DC FOODSHED

placeholder

A **Food Desert** is a region with limited or no access to healthy foods. Some DC neighborhoods have limited shopping options for residents to buy fresh groceries and produce. This map illustrates the disproportionate availability of grocery stores across the city.

Green dots identify grocery stores, the surrounding green circles represent a 1/2 mile, and the red circles represent 3/4 mile. These distances are based on ease of transporting groceries for shoppers who would be walking or taking public transportation. The data are presented on separate layers to allow adjusting their visibility.

This map can be used to help policy makers understand the relationships between food options and other variables, such as social demographics, zoning laws and public transportation. The data used for this map is

OPPORTUNITY NOW

2012 Code for America Fellowship Application

Please use this form to apply for the [2012 Code for America fellowship](#). If you're chosen, you'll need to be available full-time in the San Francisco Bay Area starting in January 2012 through November 2012. Project managers, designers, researchers, developers, and anyone else with skills to contribute are encouraged to apply.

We kept this form short for a reason: talk is cheap. What we want to see is what you can do, so point us with links to your past work, your portfolio, or your code repository.

More information about the fellowship is available online: <http://codeforamerica.org/fellows>

Candidates are allowed to apply through our early decision (ED) process for notification of selection by May 1; however, only a few spots are available through ED, and anyone not selected early will be considered during the regular decision process in the fall.

As a startup, Code for America cannot at this time sponsor work visas for international applicants. Non-US citizens with the necessary paperwork to participate in the year-long fellowship are welcome to apply.

If you have any questions about either the fellowship or the application, please contact us:
